## PROFESSIONAL SUMMARY

**Full-Stack Software Engineer** with 5 years of experience building mission-critical enterprise audit and risk platforms at Bank of America. Combines deep **frontend architecture (Angular 11–21, Micro-Frontends)** with robust **Java/Spring Boot and MuleSoft** backend integrations. Proven track record of accelerating engineering velocity via custom **Agentic AI** workflows while upholding strict federal compliance, zero-vulnerability quality gates, and UI accessibility standards.

## TECHNICAL SKILLS

- **Frontend:** Angular (v11–v21), TypeScript, JavaScript (ES6+), React.js, RxJS, HTML5/CSS3, Micro-Frontends, PrimeNG
- **Backend:** Java, Spring Boot, MuleSoft (REST APIs), Node.js, Python, Microservices
- **Databases:** Oracle SQL, MySQL, MongoDB, PL/SQL, Toad
- **Cloud, DevOps & Security:** Docker, Ansible, Splunk, SonarQube, AMP Scans, ADA / JAWS Compliance, CI/CD
- **AI & Tooling:** Agentic AI workflows, Model Context Protocol (MCP), GitHub Copilot, Insomnia, Jira, Git

## PROFESSIONAL EXPERIENCE

- Software Engineer 1-A at Bank of America** — Ahmedabad, India June 2021 – Present
- **Migrated** core enterprise repositories from **Angular 11 to 21**; leveraged **Agentic AI** for boilerplate syntax codemods while manually resolving complex RxJS/AST breaking changes with **zero downtime**.
  - **Built** the end-to-end cyclical Risk Assessment platform using **Angular, Spring Boot, and MySQL**, streamlining enterprise risk tracking and boosting internal auditor productivity by **60%**.
  - **Engineered** reusable REST APIs via **MuleSoft** and **Spring Boot** to expose downstream Oracle DB flows, supporting critical regulatory features with **100% data accuracy**.
  - **Automated** Jest unit testing from **0% to 90%** coverage via custom **Agentic AI (MCP)** scaffolding workflows, manually writing complex integration mocks to slash test overhead by **90%**.
  - **Architected** a modular **Micro-Frontend architecture** and custom Angular component libraries using enterprise design patterns, accelerating cross-application feature delivery.
  - **Overhauled** application compliance by resolving **100% of SonarQube** security gates and utilizing AMP scans to achieve complete **ADA** and **JAWS** screen-reader compatibility.
  - **Optimized** bootstrap latency by **30%** and mitigated memory leaks through **OnPush change detection**, lazy loading, and aggressive dependency tree-shaking.
  - **Shipped** a custom **JS/LLM** tool hooked into the Jira API to translate complex engineering payloads into plain-English summaries, cutting onboarding friction for new joiners by **40%**.

## EDUCATION

**Sardar Vallabhbhai National Institute of Technology (NIT Surat)**  
Bachelor of Technology (B.Tech) in Computer Engineering | GPA: **8.88/10** | 2017 – 2021

## PROJECTS

- Spends Analyzer** | Full-Stack Wealth Dashboard (Angular, Spring Boot, MySQL)
- Built a personal finance application tracking net worth and liabilities, connecting an Angular UI to Spring Boot RESTful APIs processing daily transactions.

## ACHIEVEMENTS & PUBLICATIONS

- Publication: Authored "**Contextual Feature Granularity**" for fake news detection, published in the Springer Journal.
- Awards: **Double BofA Award Winner (Gold & Silver)** for technical leadership; **Finalist** in the 2023 firm-wide **EET Innovation Challenge**.
- Community: Technical author on **Medium** with **20,000+** organic impressions covering emerging web development technologies.
